

HIP3300 SERIES

60KVA
3:3 phase PF:0.8/0.9

Features

- DSP-controlled technology
- Parallel redundancy up to 4 units
- Wide input voltage and frequency windows
- High power density up to 500kVA for space saving
- Easy-to-operate LCD display
- ECO mode for energy saving
- Unity power factor and low input distortion
- Output power factor at 0.8(0.9 optional)
- Common or separate battery
- Programmable battery voltage from $\pm 192\text{Vdc}$ to $\pm 240\text{Vdc}$
- Programmable control and monitoring software
- Intelligent charge modes with smart charge current adjustment
- Megatec/Mod Bus protocol supported
- Powerful charger built in
- Versatile communication interfaces provided for different applications
- Superior overload capability

Control Panel
