

## RELAY TYPE

# EER

## AUTOMATIC VOLTAGE REGULATOR

### Feature

This series automatic voltage regular is a kind of relay control stabilizer. it owns the wide input voltage range. compact size. light in weight delay output. litte wave distortion and reliable. strict design and accurate assemble. this kind of stabilizer can add regulating function also. In one word this type stabilizer is very popular in overseas for the competitive and stable performance.

### EER SERIES

- Fast Response for fluctuation
- Reliable Stabilization for secure Energy
- High efficiency in each model
- Short circuit protection
- Ability to work with non-linear loads
- Wide input voltage range version (optional)
- Digital Display option available

# RELAY TYPE

## EER SERIES AVR 5KVA

### Application

Techorse AVR is used with any computer system, fax and photocopy machines, industrial medical, laboratory, office appliances and household for secure energy AVR protects your load from all fluctuation of the mains voltage and regulates it.

Model	Requirment	AVR-0013
Power (VA)		EER-5000VA
Brand	Techorse	
	Phase Voltage Frequency power source	Single phase 90-260VAC 50HZ/60HZ Iron core shape
Output	Voltage Efficiency Frequency Over voltage Protection	220V+8%.110V+10% 98% 50HZ/60HZ AC246V+4V
Protection	Under -volt Over -volt Over heat By pass Delay Over load/short circuit	Optional Optional Optional No 3-7min/3-7sec(optional) Yes
Enviroment	Operating Tempreture Storage Tempreture Humidity	Optional Optional Optional No 3-7min/3-7sec(optional) Yes
Packaging	pcs per carton Machine Size (cm) Package dimensions (cm)	-10-40C -15-45C 20% to 90%
